- 1. The document may be used for information only and may not be exploited for commercial purposes.**
- 2. Any copy of this document or portion thereof must include this copyright notice.**
- 3. Regulations applicable to air law, air traffic and control in the respective countries are reserved in any event. They must be observed and, where applicable, take precedence over any sport regulations**

Note that any product, process or technology described in the document may be the subject of other Intellectual Property rights reserved by the Fédération Aéronautique Internationale or other entities and is not licensed hereunder.

RIGHTS TO FAI INTERNATIONAL SPORTING EVENTS

All international sporting events organised wholly or partly under the rules of the Fédération Aéronautique Internationale (FAI) Sporting Code¹ are termed *FAI International Sporting Events*². Under the FAI Statutes³, FAI owns and controls all rights relating to FAI International Sporting Events. FAI Members⁴ shall, within their national territories⁵, enforce FAI ownership of FAI International Sporting Events and require them to be registered in the FAI Sporting Calendar⁶.

An event organiser who wishes to exploit rights to any commercial activity at such events shall seek prior agreement with FAI. The rights owned by FAI which may, by agreement, be transferred to event organisers include, but are not limited to advertising at or for FAI events, use of the event name or logo for merchandising purposes and use of any sound, image, program and/or data, whether recorded electronically or otherwise or transmitted in real time. This includes specifically all rights to the use of any material, electronic or other, including software, that forms part of any method or system for judging, scoring, performance evaluation or information utilised in any FAI International Sporting Event⁷.

Each FAI Air Sport Commission⁸ may negotiate agreements, with FAI Members or other entities authorised by the appropriate FAI Member, for the transfer of all or parts of the rights to any FAI International Sporting Event (except World Air Games events⁹) in the discipline¹⁰, for which it is responsible¹¹ or waive the rights. Any such agreement or waiver, after approval by the appropriate Air Sport Commission President, shall be signed by FAI Officers¹².

Any person or legal entity that accepts responsibility for organising an FAI Sporting Event, whether or not by written agreement, in doing so also accepts the proprietary rights of FAI as stated above. Where no transfer of rights has been agreed in writing, FAI shall retain all rights to the event. Regardless of any agreement or transfer of rights, FAI shall have, free of charge for its own archival and/or promotional use, full access to any sound and/or visual images of any FAI Sporting Event. The FAI also reserves the right to arrange at its own expense for any and all parts of any event to be recorded.

6.3	PRIZES AND AWARDS	15

Addendum A: Definitions

Addendum B: Acrobatic Wingsuit Flying Compulsory Sequences

Addendum C: Acrobatic Wingsuit Flying Judging Criteria

Addendum D : Performance flying. The DFP, DL and penalties scheme.

1 FAI AUTHORITY

The competition will be conducted under the authority granted by the FAI, according to the regulations of the Sporting Code of the FAI, General Section, and Section 5 as approved by the IPC and validated by the FAI, and these rules. All participants accept these rules and the FAI regulations as binding by registering in the competition.

2 DEFINITIONS OF WORDS AND PHRASES

Performance Event:

Competition window: A vertical 1000 meter window, starting at 3000 m (9843ft) Geometric Altitude and ending at 2000 m (6562ft) Geometric Altitude, in which the performance of the wingsuit flyer is evaluated. The first crossing of the upper window boundary starts the evaluation process, which stops at the first crossing of the lower window boundary.

Position logging device (PLD): A device used to record the real-time, three-dimensional (3D) position of the wingsuit flyer, which is mounted on the wingsuit flyer's body or equipment.

Spherical error probability (SEP): The horizontal and vertical accuracy specifications of a PLD expressed in terms of a sphere of given radius; for example, "real-time accuracy <10 meters SEP."

Flight Director: a person appointed by the Meet Director to act as in-flight liaison to coordinate jump runs and facilitate exits.

Geometric Altitude: The height, as measured by a Global Navigation Satellite System, optical methods or radar, above ground level. The ground level for the competition site will be determined by the Meet Director and will be made known at the pre-event competitors' meeting.

Designated Flight Path: the straight ground track between a point on the competitor's flight path reached 5 seconds after exit and a designated ground reference point, which is given prior to the jump to the competitor by the Meet Director using a detailed map or aerial photograph of the area. The map and/or photograph must be acceptable to the FAI Controller.

Designated Lane: a lane which is centered on the Designated Flight Path with a width of 600 metres

Acrobatic Event

Compulsory routine: a routine composed of compulsory sequences chosen at random from Addendum B by the Chief Judge.

Free routine: a routine composed of manoeuvres chosen entirely by the Team.

Grips

- 1) A **hand grip** consists of a controlled stationary contact with the front or back of the hand. The contact must be on or below the wrist.
- 2) A **leg grip** consists of a controlled stationary contact with the front or back of the hand on the leg below the hip.
- 3) A grip on the surface of any wingsuit without also achieving a controlled stationary contact with the front or back of the hand on a specified part of the body as defined in 1) and 2) above is specifically excluded from the definition of a grip.

Manoeuvre: a change in body position or a rotation around one or more of the three (3) body axes or a static pose

Normal Flight: The performer is in a belly-to-earth stable position

NV: No Video – no video image is available for judging purposes.

Omission

- 1) a manoeuvre or grip is missing from the drawn sequence or
- 2) there is no clear intent to perform the chosen manoeuvre or
- 3) an attempt at a grip is seen and another manoeuvre or grip is presented and there is an advantage to the team resulting from the substitution.

Routine: compulsory sequences or manoeuvres performed during the working time.

Team: an Acrobatic Wingsuit Flying Team is composed of two (2) Performers and a Videographer, all three of whom are Team Members

Working time: the period of time during which Teams may perform a routine during a jump. Working time starts the instant any Team Member separates from the aircraft, as determined by the judges, and terminates after the interval designated in 4.3.2 and 4.3.3.

3 THE PERFORMANCE EVENT**3.1 Objective**

- 3.1.1 The objective is to fly a single wingsuit in three separate tasks to demonstrate a combination of best lift (time task), best glide (distance task) and least drag (speed task).
- 3.1.2 Each round of the event is comprised of the three tasks.
- 3.1.3 Each task is performed on a separate flight.

3.2 Tasks

3.2.1 Time Task: The wingsuit flyer is to fly with the slowest fall rate possible through the competition window. The result for this task will be the time spent in the competition window, expressed in seconds, rounded to one decimal place.

3.2.2 Distance Task: The wingsuit flyer is to fly as far as possible through the competition window. The result for this task will be the straight-line distance flown over the ground while in the competition window, expressed in meters, rounded to whole numbers.

3.2.3 Speed Task: The wingsuit flyer is to fly as fast as possible horizontally over the ground through the competition window. The result for this task will be the straight-line distance flown over the ground while in the competition window divided by the time spent in the competition window, expressed in meters per second, rounded to one decimal place.

3.3 Program

- 3.3.1 A competition shall consist of three rounds, with three tasks in each round, for a total of nine flights.
- 3.3.2 At least one round must be completed to determine rankings and declare winners
- 3.3.3 The minimum exit altitude is 12,000ft Geometric Altitude. The maximum exit altitude (at the start of jump run) is 12,500ft Geometric Altitude.
- 3.3.4 For meteorological and/or Air Traffic Control reasons only, and with the consent of the Chief Judge, the Meet Director may lower the exit altitude to 10,000ft Geometric Altitude and continue the competition. The Competition Window does not change; i.e. it stays 3000-2000m. If the exit altitude is lowered it must apply for a complete task for all competitors
- 3.3.5 The order of tasks will be determined by a random draw conducted by the Meet Director during the competitor briefing. This order may be changed by the Meet Director for meteorological or air traffic control reasons.

3.4 JUMP RUN AND EXIT ORDER

- 3.4.1 The jump run should be perpendicular to the wind line upwind of the designated landing area, which is established by the Meet Director.
- 3.4.2 The starting order of the first task of jumping shall be in reverse order of the standings at the most recent FCE, Competitors that did not participate in the most recent FCE will jump at the beginning of the task with the order determined by a random draw made by the Meet Director.
- 3.4.3 A Flight Director must be placed aboard an aircraft larger than eight places to assist competitors with identification of ground reference points and landmarks.
- Under no circumstances will such a Flight Director direct a competitor to exit. That decision is solely the responsibility of the competitor.
- 3.4.4 The number of competitors to exit on a single pass of the aircraft and the spacing of those exits will be determined by the Meet Director. The horizontal spacing must be no less than 600m. This will be expressed to the competitors as a time, in seconds, between exits. Immediately after exit, each competitor will turn directly towards his designated flight path.
- 3.4.5 Exit procedure: There are no limitations on the exit other than those imposed by the Chief Pilot for safety reasons. If a competitor exits in a manner deemed unsafe, the matter will be referred to the Safety Panel (SC5, 4.8).

3.5 Flight Pattern

- 3.5.1 The first exit point on an aircraft pass will be determined by the Meet Director. The aircraft pilot will signal the competitors when they are clear to exit. All the competitors will be briefed on the specific exit signals at the pre-event competitors' meeting.
- 3.5.2 The Designated Flight Path of each competitor using a ground reference point will be determined by the Meet Director and will be given to that competitor using a detailed map or aerial photograph of the area.
- 3.5.3 A competitor must not leave his Designated Lane (DL). Violation of this rule during the time period from 5.0 sec after exit to deployment of the parachute, as determined by the panel of judges, will result in the following reduction of the score otherwise determined in 3.9.1:
- if less than 150 m outside the DL, a 10% reduction;
 - if 150-300 m outside the DL, a 20% reduction;
 - if more than 300 m outside the DL a 50% reduction for the first such infringement or a score of zero for any such infringement on a subsequent jump.
- The distance referred to will be measured at right angles to the DL boundary
- 3.5.4 A competitor must not deviate more than 30 degrees away from the DFP. Violation of this rule during the time period from 5.0 sec after exit to deployment of the parachute, as determined by the panel of judges, will result in the following reduction of the score otherwise determined in 3.9.1 adjusted by any penalty assessed in accordance with 3.5.3:
- a 50% reduction for the first infringement or a score of zero for an infringement on any subsequent jump.
- 3.5.5 At no time from exit to deployment of the parachute shall a competitor(s) come within 250m of any other competitor(s). Violation of this rule, as determined by the panel of judges, will result in a score of zero for that jump. This decision shall not be grounds for protest.

- 3.5.6 Any violation of 3.5.3, 3.5.4 or 3.5.5 that results in endangering other competitors shall be considered a serious endangerment and will be referred to the Safety Panel (SC5, 4.8).

3.6 GENERAL RULES

- 3.6.1 The deployment altitude for each competitor will be pre-determined by the Meet Director and must not exceed 5000ft AGL.
- 3.6.2 Any violation of 3.6.1 that results in endangering other competitors shall be considered a serious endangerment and referred to the Safety Panel (SC5, 4.8).
- 3.6.3 All jumps for each task of a round should be made from the same, or back-to-back loads, in order that competitors jump in similar winds.

3.7 Equipment

- 3.7.1 Competitors shall not carry additional or removable weight on their body or equipment. They must be weighed by the FAI Controller, or a person appointed by the FAI Controller for the purpose, at the start of the competition wearing all their normal jump equipment to establish a baseline weight. The FAI Controller, or a person appointed by the FAI Controller for the purpose, must conduct subsequent random weight checks, which may fluctuate from the baseline weight by no more than +/- 2kg before requiring an inspection. If the addition or removal of weight is detected, the score for that jump will be zero. This decision shall not be grounds for protest.
- 3.7.2 Competitors shall not use propulsion systems. If any propulsion system is used, the score will be zero for that jump.
- 3.7.3 A competitor shall not wear any other electronic device or wires closer than 2.54cm from the official PLD as measured by the judging staff. However, a second identical PLD unit may be worn without regard to this separation requirement. If any such electronic device affects the PLD system, and the source of the interference is not obvious and beyond the reasonable control of the jumper, a rejump may be granted by the Chief Judge, in which case 3.6.3. will not apply
- 3.7.4 Each competitor must wear a functioning audio altitude warning device on every jump. Failure to do so will result in a score of zero for that jump.
- 3.7.5 The same wingsuit, without any changes or modifications of its parts, must be used throughout the competition. In exceptional circumstances, a wingsuit may be changed with the consent of the Chief Judge, e.g., if the original suit gets damaged and cannot be made airworthy.
- 3.7.6 Wingsuits will be inspected and marked by a Judge. Only marked suits may be used for the competition. Using an unmarked suit will result in a score of zero for that jump.
- 3.7.7 Each competitor shall wear one PLD provided by the Organiser and issued by a Judge. The device will be attached on the jumper's equipment with the antenna having a clear view of the sky, located and positioned to the satisfaction of the Judge. This decision shall not be grounds for a protest.
- 3.7.8 The PLD will be attached in its location by a Judge.
- 3.7.9 The PLD will be turned on and off by a Judge or by the competitor if instructed to do so by any Judge.
- 3.7.10 Immediately after landing, the competitor shall return the PLD used on that jump to a Judge.

- 3.7.11 If the PLD is found to have been tampered with and if in the opinion of a Judge this was not caused by circumstances beyond the control of the competitor, then no rejump will be awarded and the competitor will receive a score of zero for that jump. This decision shall not be grounds for a protest.
- 3.7.12 If the PLD malfunctions and, in the opinion of a Judge, the malfunction was not caused by action or interference by the competitor, then the competitor will be given the option of making a rejump, in which case 3.6.3. will not apply, or receiving a score of zero for that jump.

3.8 Position Logging Device (PLD)

- 3.8.1 The PLD must record real-time three-dimensional (3D) data with a resolution of at least 5Hz and a position accuracy (SEP) of less than 10 meters.
- 3.8.2 The PLD must not require any action by the competitor in order for it to function, and it must activate its recording function automatically.
- 3.8.3. Once attached to the competitor, the settings on the device must not be capable of being altered by the competitor, nor must it be possible for the competitor to delete the data without this being easily evident to the Judges. Tampering with the device will result in a score of zero for the jump. This decision is not grounds for protest.
- 3.8.4 The data recorded by the PLD must be downloaded and saved as soon as possible after the competitor has handed in the devices, and before the PLD is used again

3.9 Determination of the Winners

- 3.9.1 Each task in each round will be scored based on the top score of the task performed in that round. The top result will be scored as 100%. The other results will be scored as a percentage of the top score.
- 3.9.2 The score calculated in 3.9.1 for all rounds for each separate task, adjusted by any penalties arising from 3.5.3, 3.5.4 and 3.5.5 will be averaged for each competitor for an intermediate result of the task.
- 3.9.3 The three intermediate results for each task for each competitor are added and rounded to one decimal place to give the total result for the competitor.
- 3.9.4 The total result for the competitor determines the ranking.
- 3.9.4.1 In the event of a tie in the first three places, the following tie-break rules apply:
- 3.9.4.2 A tie-break jump will be made. The task shall be drawn at random by the Chief Judge.
- 3.9.4.3 If the tie cannot be broken by the tie break jump, the competitors concerned shall have equal placement.
- 3.9.4.4 Any other ties in the standings shall have equal placement.

4 THE ACROBATIC EVENT

4.1 Objective

- 4.1.1 The objective is for a team to perform a sequence of manoeuvres
- 4.1.2 There is no distinction as to gender.

4.2 Program

- 4.2.1 The competition will consist of seven rounds. The minimum number of rounds for a valid competition will be one (1) round.
- 4.2.2 The seven (7) rounds shall consist of:
- Four (4) Compulsory Routine rounds

- Three (3) Free Routine rounds

4.2.3 The order of the routines shall be F-C-C-F-C-C- F (C = compulsory; F = free).

4.3 Exit Altitude and Working Time

4.3.1 Unless otherwise specified in this section, the maximum exit altitude is 12,500ft AGL.

4.3.2 Unless otherwise specified in this section, the working time is 65 seconds.

4.3.3 For meteorological and/or Air Traffic Control reasons only, and with the consent of the Chief Judge, the Meet Director may lower the exit altitude to 10,000 ft. AGL with a working time of no less than 55 seconds and continue the competition. However, if the exit altitude is lowered it must apply for a complete round for all teams

4.4 General Rules

4.4.1 The deployment altitude for each team will be pre-determined by the Meet Director in order to maximize team separation and may not exceed 5000ft AGL.

4.4.2 Competitors may change their role in the team from jump to jump; however, they may only perform one role (Performer A, Performer B, Videographer) during a jump

4.4.3 The performer (defined as Performer A, Performer B) who executes the first manoeuvre in each compulsory routine is defined as Performer A; this establishes the performer's role in the sequences (described in Addendum B) for the remainder of the routine

4.4.4 The starting order of the first round of jumping shall be in reverse order of the standings at the most recent FCE. Teams that did not participate in the most recent FCE will jump at the beginning of the round with the order determined by random draw made by the Meet Director.

4.4.5 Representation:

4.4.5.1 A team may represent only one (1) NAC.

4.4.5.2 Each participant may be a member of only one team.

4.5 Compulsory Routines

4.5.1 The Compulsory Routines consist of two (2) Compulsory Sequences as described in Addendum B.

4.5.2 The Compulsory sequences may be repeated until the end of working time.

4.5.3 The Compulsory Sequences to be used on each jump are determined via a random draw

4.5.4 The draw of all compulsory round sequences will be done publicly and supervised by the Chief Judge. Teams will be given not less than two hours' knowledge of the results of the draw before the competition starts.

4.5.5 Sequences shown in Addendum B will be individually placed in one container. Individual withdrawal from the container, (without replacement), will determine the sequences to be jumped in each round. A sequence, once drawn, will be put aside and may not be used again. However, if all available sequences have been used and the draw is not complete, the process will be re-started until the draw is complete.

4.5.6 The order of the compulsory sequences is determined by the order in which they are drawn.

4.5.7 After completion of the draw as determined in 4.5.5, the Chief Judge will determine whether a tie break jump will be a Free Round or Compulsory Round using the following procedure:

4.5.7.1 One Free Round and one Compulsory Round marker will be placed in one container. One marker will be drawn from the container in order to determine the type of tie break round.

4.5.7.2 If the tie break round determined in 4.5.7.1 is a Compulsory Round, the Sequences will be drawn in accordance with 4.5.5 and 4.5.6.

4.6 Free Routines

4.6.1 The content of the Free Routine(s) is chosen entirely by the Team and may or may not include grips.

4.6.2 The Team may perform the same Free Routine in each Free Round.

4.6.3 Teams are encouraged to deliver a description of their Free Routine(s) to the Chief Judge before the start of the competition, using a standard form provided by the Chief Judge. Not providing this information shall have no bearing on the team's score. Deviation from the described Free Routine shall have no bearing on the scoring.

4.7 Air-to-air video recording

4.7.1 For the purpose of these rules, "air-to-air video equipment" shall consist of the complete video system used to record the evidence of the team's performance, including camera(s), recording media, cables and battery. The air-to-air video equipment must be able to deliver a High Definition (HD 1080i / 1080p) digital signal through a compatible video connection approved by the Video Controller.

4.7.2 The videographer is responsible for assuring the compatibility of the air-to-air video equipment with the scoring system.

4.7.3 The camera must be fixed by a static mount to the helmet. No roll, pitch or yaw movements of the camera, mechanical and/or digital zoom adjustment, or any digital effects (excluding "steady shot" or other image stabilization feature) may be used during competition jumps. Failure to meet any of these requirements will result in a score of zero (0) points.

4.7.4 A Video Controller will be appointed by the Chief Judge prior to the start of the judges' conference. The Video Controller may inspect a team's air-to-air video equipment to verify that it meets the performance requirements. Inspections may be made at any time during the competition which does not interfere with a team's performance, as determined by the Event Judge. If any air-to-air video equipment does not meet the performance requirements as determined by the Video Controller, this equipment will be deemed to be unusable for the competition.

4.7.5 Video Review Panel (VRP). A VRP will be established prior to the start of the official training jumps, consisting of the Chief Judge, the President of the Jury, and the FAI Controller. The VRP may enlist the help of the Video Controller. Decisions rendered by the VRP shall be final and shall not be subject to protest or review by the Jury.

4.7.6 The Organizer shall provide the teams with a way of identification showing the team and round number, to be recorded by the videographer just before exit.

4.7.7 The team's video recording must continue from team/round identification through the exit and the jump without interruption. Failure to meet this requirement will result in a score of zero (0) points.

4.7.8 The videographer shall provide the video evidence required to judge each jump and to show the team's performance to relevant third parties. It is the responsibility of the videographer to show the start of working time. If, in the opinion of the Panel of judges, the start of working time is not clearly shown a penalty of 20% shall be deducted from the team's Camera score for that jump as determined in 5.2.8.3.

4.7.9 As soon as possible after each jump, the videographer must deliver the air-to-air video equipment for dubbing at the designated station. The video evidence must remain available for viewing or dubbing until all scores are posted as final.

4.8 Rejumps

- 4.8.1 In a situation where the video evidence is considered insufficient for judging (NV – see 5.2.6.6) by a majority of the judging panel, the air-to-air video equipment will be handed directly to the VRP for assessment and a determination as follows:
- 4.8.2 If the VRP determines that there has been an intentional abuse of the rules by the team, no rejump will be granted and the team's score for that jump will be zero (0).
- 4.8.3 In the case the VRP determines the insufficiency of the video evidence is due to a factor that could be controlled by the team, no rejump will be granted and the team will receive a score based on the video evidence available.
- 4.8.4 If the VRP determines the insufficiency of the video evidence is due to weather conditions or a cause beyond the control of the team, a rejump will be given.
- 4.8.5 Contact or other means of interference between performer(s) and/or the videographer in a team shall not be grounds for a rejump.
- 4.8.6 Problems with a competitor's equipment (including air-to-air video equipment) shall not be grounds for a rejump.
- 4.8.7 Adverse weather conditions during a jump are not grounds for a protest. However, in circumstances not covered by 4.8.1, a rejump may be granted due to adverse weather conditions, at the discretion of the Chief Judge.

4.9 Determination of Winners

- 4.9.1 The winners (1st, 2nd and 3rd) are the teams with the three highest total scores for all completed rounds.
- 4.9.2 In the event of a tie in the first three places, a tie-break jump, as determined in 4.5.7 will be made.
- 4.9.3 If the tie cannot be broken by the tie-break jump, the following procedure will be applied until a clear placing is determined:
 - 4.9.3.1 the best score, then the second best score, of any completed free rounds.
 - 4.9.3.2 the best score, then the second best score, of any completed compulsory rounds.
- 4.9.4 Any other ties in the standings shall have equal placement.

5 JUDGING & SCORING

5.1 Performance Event

- 5.1.1 Scoring will be supervised by at least two FAI Wingsuit Judges.

5.2 Acrobatic Event

- 5.2.1 Once any team member has left the aircraft, the jump shall be evaluated and scored.
- 5.2.2 The evaluation of each sequence will take place during the full working time but may cease before the end of working time if the team abandons the performance requirements for the required routine. Teams may continue scoring by continually repeating the sequences in the required order.
- 5.2.3 Judging procedures:
 - 5.2.3.1 The jumps shall be judged using the video evidence as provided by the videographer.
 - 5.2.3.2 A panel consisting of five (5) judges must evaluate each team's routine. Where possible, a complete round shall be judged by the same panel.
 - 5.2.3.5 Judges may view the jump a maximum of three (3) times. A fourth viewing may be allowed at the discretion of the Event Judge.

- 5.2.4 All viewings must be at normal speed.
- 5.2.5 The judges will use the electronic scoring system to record the evaluation of the performance. At the end of working time, freeze frame will be applied on each viewing, based on the timing taken from the first viewing only. The judges may correct their evaluation record after the jump has been judged. Corrections to the evaluation record **may** only be made before the Chief Judge signs the score sheet.
- 5.2.6 Scoring Compulsory Routines:
- 5.2.6.1 The Routine is evaluated using three (3) criteria: style, number of grips and camerawork.
- 5.2.6.2 The judges will assign the style and camerawork a point score from 0.0 to 10.0 to one decimal point, based on the guidelines in Addendum C.
- 5.2.6.3 For each manoeuvre omission, as determined by a majority of the judges, 1.5 points will be deducted from the style point score otherwise given by each judge.
- 5.2.6.4 One point will be assigned for each grip correctly performed in the routine within the working time of each round, as determined by a majority of the judges. The score given for grips shall be in whole integers only.
- 5.2.6.5 For each grip omission one (1) point will be deducted from the total determined in 5.2.6.4. If an infringement in the scoring formation of a manoeuvre is carried into to the next grip this will be considered as one infringement only, provided that the intent of the manoeuvre requirements for the next formation is clearly presented.
- 5.2.6.6 A majority of Judges must agree in order to determine an NV situation.
- 5.2.6.7 If, after the viewings are completed, and within fifteen seconds of the knowledge of the result, the Chief Judge, Event Judge or any Judge on the panel considers that an absolutely incorrect assessment of a grip has occurred, the Chief Judge or Event Judge will direct that only that part(s) of the jump in question be reviewed. If the review results in a four to one decision by the Judges on the part(s) of the performance in question, the assessment of that grip will be adjusted accordingly. Only one review is permitted for each jump.
- 5.2.6.8 The minimum score for any of the criteria is zero points.
- 5.2.7 Scoring Free Routines:
- 5.2.7.1 The Routine is evaluated using three (3) criteria: style, dive plan and camerawork.
- 5.2.7.2 Judges will give each of the above three criteria a score from 0.0 to 10.0, to one decimal point, based on the guidelines in Addendum C.
- 5.2.8 Score Calculation:
- 5.2.8.1 The team's score for a round for each of the criteria in 5.2.6 and 5.2.7, other than grips, is calculated by discarding the high and low scores and averaging the three remaining scores, rounded to one decimal place.
- 5.2.8.2 The team's score for style (all rounds), dive plan (free round) and camera (all rounds) as calculated in 5.2.8.1 and for grips (compulsories) as calculated in 5.2.6.4 and 5.2.6.5, will be weighted 0% to 100% for each criterion for all teams for that round, the highest score being weighted 100% (100), and a zero score being weighted 0% (0). The total score of a team for a round is then calculated by adding the three weighted percentage scores for that round.
- 5.2.8.3 The team's final score for the event is the sum of the total scores from all completed rounds as calculated in 5.2.8.2.
- 5.2.9 All scores for each judge will be made public.

5.3 Training Jumps:

- 5.3.1 One day will be set aside prior to the start of the competition for each Acrobatic team and each Performance competitor to have the opportunity to make two (2) training jumps, which will be scored by the judges. The aircraft and the judging and scoring systems to be used in the competition will be used for these training jumps. If no training jumps are possible due to weather, teams may deliver up to two (2) previously recorded training jumps for scoring.
- 5.3.2 If a team or competitor chooses to make less than the two training jumps permitted or it is not possible to make the two official training jumps scheduled due to weather conditions or other circumstances, this shall not be grounds for a protest.
- 5.3.3 Prior to the start of official training jumps, an Acrobatic team may present a free routine description to the Chief Judge so that it can be scored by the judges, as per 5.3.1.

5.4 Other Judging responsibilities – Performance and Acrobatic

- 5.4.1 One or more individuals, supervised by the Chief Judge (or trainees under the supervision of the Chief of Judge Training) may support the judges in equipment, device and data management.
- 5.4.2 One or more qualified individuals, supervised by the Meet Director, must observe the competitors during their descent and on opening. The observer must check for any conditions or incidents that might constitute grounds for a re-jump and/or disqualification for safety reasons. A written record must be made of any unusual observations or incidents.
- 5.4.3 The Chief Judge and/or Meet Director may interrupt the event if they determine the meteorological conditions are not safe for the conduct of the event. This decision is not grounds for a protest.

6 TITLE OF THE COMPETITION

“The ___ FAI World Wingsuit ___ Flying Championship, (location), (year)” or,
 “The ___ FAI World Cup of Wingsuit ___ Flying, (location), (year)” or,
 “The ___ FAI World Wingsuit Flying Championship, (location), (year)” or,
 “The ___ FAI (continent) Wingsuit ___ Flying Championship, (location), (year)” or,
 “The ___ FAI (continent) Cup of Wingsuit ___ Flying, (location), (year).”

6.1 Aims of the Competition

- 6.1.1 To determine the Champions (1st, 2nd, 3rd) of Wingsuit Performance Flying.
- 6.1.2 To determine the Champions (1st, 2nd, 3rd) of Wingsuit Acrobatic Flying.
- 6.1.3 To promote and develop Wingsuit Flying training and competition.
- 6.1.4 To establish new World and Continental Wingsuit Performance Flying competition records.
- 6.1.5 To present a visually attractive image of the competition jumps and timely standings (scores) for competitors, spectators and media.
- 6.1.6 To exchange ideas and strengthen friendly relations between wingsuit flyers, judges and support personnel of all nations.
- 6.1.7 To allow participants to share and exchange experience, knowledge and information.
- 6.1.8 To improve judging methods and practices.

6.2 Composition of Delegations

- 6.2.1 Each delegation may be comprised of:
 - 6.2.1.1 One Head of Delegation.
 - 6.2.1.2 One Team Manager/Coach
 - 6.2.1.3 One Interpreter.
 - 6.2.1.4 A maximum of eight (8) performance competitors for a World Championships.
 - 6.2.1.5 A maximum of twelve (12) performance competitors for a World Cup or Continental Regional Championships
 - 6.2.1.6 A maximum of two (2) acrobatic teams for a World Parachuting Championships.
 - 6.2.1.7 A maximum of four (4) acrobatic teams for a World Cup or Continental Championship
 - 6.2.1.8 Accompanying persons and additional support personnel at the discretion of the event organizer.

6.3 Prizes and Awards

- 6.3.1 Medals are awarded to the first three performance competitors with the highest overall ranking.
 - 6.3.1.1 Diplomas are awarded to the top ten performers in the Performance event.
 - 6.3.1.2 The flags of the first, second and third-placed performance competitors shall be flown and the national anthem of the first-place winner played.
- 6.3.2 Medals are awarded to the first three acrobatic teams.
 - 6.3.2.1 The flags of the countries of the first, second and third-placed acrobatic teams shall be flown and the national anthem of the first-place team played.
 - 6.3.2.2 In the event an FAI International acrobatic team is among the first three places, the flag of the FAI shall be flown for that team. In the event the international team wins first place, the FAI anthem will be played.
- 6.3.3 The title of World or Continental Champion is awarded to the first placed competitor or team in a FAI World/Continental Parachuting Championships.
- 6.3.4 The title of World Cup Winner is awarded to the first placed competitor or team in a FAI World Cup.

ADDENDA A, B, C, D

Addendum A: Definitions

Addendum B: Acrobatic Wingsuit Flying Compulsory Sequences

Addendum C: Acrobatic Wingsuit Flying Judging Criteria

Addendum D: Performance flying. The DFP, DL and penalties scheme.

Addendum – A Definitions

A. Basic rotational actions

A-1 Barrel Roll

A barrel roll is a 360 degree rotation about the body head-toe axis, when that axis is aligned with the direction of flight. The rotation of a barrel roll may be performed in either direction (clockwise or anti-clockwise)

A-2 Back Loop

A back loop is a loop where the rotation is initiated about the body left-right axis with the torso rotating backwards.

A-3 Front Loop

A front loop is a loop where the rotation is initiated about the body left-right axis with the torso rotating forwards.

Addendum - B

Acrobatic Wingsuit Flying Compulsory Sequences

- Compulsory sequences may be broken down into separate elements during execution, but will result in lower scoring on style.
- The last position of each Compulsory sequence leads into the beginning position of the next Compulsory sequence, and is counted as one grip.
- Performers are defined as Performer A and B.
- Other than for the first grip of the jump, a valid grip must be preceded by clear total separation, which is when the performers show at one point in time that they have released the grip and no part of their arms have contact with the other performer;

Sequence A: Up and Over

- Performers are in normal flight with a hand grip.
- Performers show total separation and then Performer A transitions over Performer B to the other side.
- Performers take a hand grip in normal flight.
- Performers show total separation and then Performer B transitions over Performer A to the other side.
- Performers take a hand grip in normal flight.

Sequence B: Rock and Roll

- Performers are in normal flight with a hand grip.
- Performers show total separation and then Performer A performs a barrel roll.
- Performers take a hand grip in normal flight.
- Performers show total separation and then Performer B performs a barrel roll.
- Performers take a hand grip in normal flight.

Sequence C: Revolutions

- Performers are in normal flight with a hand grip.
- Performers show total separation and then Performer A transitions over Performer B to the other side and then transitions back under Performer B to the original starting position.
- Performers take a hand grip in normal flight.
- Performers show total separation and then Performer B transitions over Performer A to the other side and then transitions back under Performer A to the original starting position.
- Performers take a hand grip in normal flight.

Sequence D: Roll Over

- Performers are in normal flight with a hand grip.
- Performers show total separation and then Performer A performs a barrel roll over Performer B to the other side.
- Performers take a hand grip in normal flight.
- Performers show total separation and then Performer B performs a barrel roll over Performer A to the other side.
- Performers take a hand grip in normal flight.

Sequence E: Fruity Loops

- Performers are in normal flight with a hand grip.
- Performers show total separation and then Performer A performs a front loop.
- Performers take a hand grip in normal flight.
- Performers show total separation and then Performer B performs a front loop.
- Performers take a hand grip in normal flight.

Sequence F: Duck and Roll

- Performers are in normal flight with a hand grip.
- Performers show total separation and then Performer A performs a barrel roll under Performer B to the other side.
- Performers take a hand grip in normal flight.
- Performers show total separation and then Performer B performs a barrel roll under Performer A to the other side.
- Performers take a hand grip in normal flight.

Sequence G: Déjà vu

- Performers are in normal flight with a hand grip.
- Performers show total separation and then Performer A transitions over Performer B to the other side.
- Performers take a hand grip in normal flight.
- Performers show total separation and then Performer A transitions over Performer B back to the other side.
- Performers take a hand grip in normal flight.
- Performers show total separation and then Performer B transitions over Performer A to the other side.
- Performers take a hand grip in normal flight.
- Performers show total separation and then Performer B transitions over Performer A back to the other side.
- Performers take a hand grip in normal flight.

Sequence H: Yin Yang

- Performers are in normal flight with a hand grip.
- Performers show total separation and then Performer A transitions to inverted flight.
- Performers take a hand grip in mixed orientation.
- Performers show total separation and then Performer A transitions to normal flight .
- Performers take a hand grip in normal flight.
- Performers show total separation and then Performer B transitions to inverted flight.
- Performers take a hand grip in mixed orientation.
- Performers show total separation and then Performer B transitions to normal flight.
- Performers take a hand grip in normal flight.

Sequence I: Back to Back

- Performers are in normal flight with a hand grip.
- Performers show total separation and then both transition to inverted flight.
- Performers take a hand grip in inverted flight.
- Performers show total separation and then both transition to normal flight.
- Performers take a hand grip in normal flight.

Sequence J: Pancakes

- Performers are in normal flight with a hand grip.
- Performers show total separation and then Performer A transitions to inverted flight over Performer B to the other side.
- Performers take a hand grip in mixed orientation.
- Performers show total separation and then Performer A transitions to normal flight over Performer B to the other side.
- Performers take a hand grip in normal flight.

- Performers show total separation and then Performer B transitions to inverted flight over Performer A to the other side.
- Performers take a hand grip in mixed orientation.
- Performers show total separation and then Performer B transitions to normal flight over Performer A to the other side.
- Performers take a hand grip in normal flight

Sequence K: Reversed Pancakes

- Performers are in normal flight with a hand grip.
- Performers show total separation and then Performer A transitions to inverted flight under Performer B to the other side.
- Performers take a hand grip in mixed orientation.
- Performers show total separation and then Performer A transitions to normal flight under Performer B to the other side.
- Performers take a hand grip in normal flight .
- Performers show total separation and then Performer B transitions to inverted flight under Performer A to the other side.
- Performers take a hand grip in mixed orientation.
- Performers show total separation and then Performer B transitions to normal flight under Performer A to the other side.
- Performers take a hand grip in normal flight .

Addendum - C

Acrobatic Wingsuit Flying Judging Criteria

C-1 Scoring Grips

Grip scoring is only required for the Compulsory Routines

- Each completed grip at the start of, during, and between each Compulsory manoeuvre will be added up to create a total number of grips.
- If multiple grips are taken during and between each Compulsory manoeuvre, only one grip will be counted.
- A grip that cannot be seen, or is considered not to meet the definition in Section 2 by a majority of the Judges, will not be included in the total number of grips Compulsory Routines have to be made in the correct sequence. A Compulsory manoeuvre omitted in the sequence will result in one point being subtracted from the total number of grips for that routine. This result may not be less than zero.

C-2 Scoring Style

Judges give a score for the Team (from 0.0 to 10.0, to one decimal point) for Presentation and for each of the four (4) Compulsory Rounds and three (3) Free Rounds, using the following guidelines:

- 10 points - Manoeuvre is performed flawlessly with no noticeable mistakes.
- 8 points - Manoeuvre is performed with some small mistakes.
- 5 points - Manoeuvre is performed with several medium mistakes.
- 3 points - Manoeuvre is performed with several major mistakes.
- 0 points – Manoeuvres are not performed or identifiable

Examples of style:

- Body position: the performers' posture should present clean and defined arm and leg position ideal for flight.
- Grips: each grip is made smooth and fully in control.
- Control: all movements made by the performers are precise and deliberate, without a lot of 'nervous' movement in the arms, legs and body or heading.
- Leveling: the performer is adjusting fall rate and level accordingly during each manoeuvre, allowing the other pilot to remain static. The less changes the static performer has to make to accommodate the active performer making a manoeuvre, the higher the score.
- Proximity: the performers stay close together, never moving more than one body distance apart.
- Transitions: more complex manoeuvres are made according to the intended figures, rather than broken down into two or more simpler elements.

Small mistake examples:

- Manoeuvre: finish slightly off heading, slight wobble, etc.
- Manoeuvre: arms bent down or forward, knees bent
- Manoeuvre: grips made resulting in tension and movement

Medium mistake examples:

- Manoeuvre: significantly off heading, wobble, not enough rotation, etc.
- Manoeuvre: grips made with considerable force, not fully in control

Major mistake examples:

- Manoeuvre: completely missing required elements or performed so poorly that the manoeuvre is barely recognizable.
- Not generating forward movement (using aerodynamic properties of the Wingsuit).
- Manoeuvre: grips made with considerable force, resulting in out of control flying by one or both Performers.

C-3 Scoring Camera

Judges give a score for camera work as a sum of two parts: Quality (from 0.0 up to 7.0, to one decimal point); and Progressive Work (from 0.0 up to 3.0, to one decimal point) for each of the four (4) Compulsory Sequences and three (3) Free Rounds, using the following guidelines:

Quality

7 points - Camerawork is flawless with no noticeable mistakes

6 points - Camerawork has some small mistakes.

4 points - Camerawork has several medium mistakes.

2 points - Camerawork has with several major mistakes.

0 points - Camerawork show no Performer Routines.

Progressive Work

3 points - Creative flying with 2 or more different progressive successful manoeuvres

2 points - Creative flying with 2 or more same progressive successful manoeuvres

1 point - Creative flying with 1 progressive successful manoeuvre

0 points - No progressive manoeuvres and no intention to show any progressive manoeuvres

Examples for good camerawork video quality:

- Video is smooth and does not bounce around.
- Performers occupy most of the video and remain centered
- Cameraman remains within a consistent distance of the Performers.
- Utilizes advanced flying techniques (i.e. Carving around the performers, back flying) resulting in creative angles without loss of framing or proximity.

Examples for Progressive Work:

- Backflying
- Carving
- Multi-axis views

Small mistake examples:

- Momentary loss of framing or focus, occasional minor distance errors, etc.

Medium mistake examples:

- Momentary loss of image, framing, focus, or distance errors for about 20 % or more of the Compulsory Sequence, etc.

Major mistake examples:

- Contact with one or both performers

- Loss of control, resulting in in lost framing of the performers or no video
- 50% or more of Compulsory Routine or Free Routine cannot be judged. .

C-4 Scoring Dive Plan

Dive plan scoring is only required for the free routine rounds. Judges give the following judging criteria a score, from 0.0 up to 10.0, to one decimal point, taking into account the following guidelines:

Technical:

- **Difficulty:** The degree of difficulty of all set sequences and transitions in the routine.
- **Flying Skills:** Ability to manoeuvre smoothly or fly in any orientation (vertically, horizontally, back flying, etc.).
- **Precision, control:** Ability of the Team to demonstrate body control and smoothness of transitions.
- **Team Work:** The ability to for the team to perform movements together to create a unified performance.

Examples for Technical:

- The two (2) Performers maintain proper proximity throughout each sequence.
- All flying surfaces and/or flight angles are used (i.e. belly to earth and back flying, steeper angles)
- A constant interaction and teamwork is displayed.
- The routine shows a wide variety of set sequences that vary by complexity.
- Team separation after each set sequence.
- Grip complexity, if present.

Presentation:

- **Visual Excitement:** Routine should hold the viewer's attention throughout, dynamic variety, entertaining without being unnecessary.
- **Originality:** Creative choreography in variety.
- **Team Work:** Routines that demonstrate combined skills of all Team Members.
- Grips performed in a controlled manner.

Examples for Presentation:

- The routine has a defining beginning and end.
- Working time is utilized to the fullest extent possible.
- The routine has a high level of creativity that contains new manoeuvres, and flows from one set sequence to the next.
- The routine is enjoyable and aesthetically pleasing to watch.

Addendum D: Performance flying: DFP, DL, Penalties
